

LAKE FOREST LIBRARY

COMMUNITY NEEDS ASSESSMENT: SUMMARY

INTRODUCTION

Today's libraries are subject to high levels of scrutiny from their constituent groups pertaining to budgeting, allocation of resources, and response to user needs and desires. As the strategic planning process begins, it is vital to be in tune with the thoughts of all of these groups – users, taxpayers, and community partners. An effective community needs assessment provides a framework for the library to allocate resources most effectively according to the needs of its community, remain relevant to its patrons, and help position it to react to changing trends in the future.

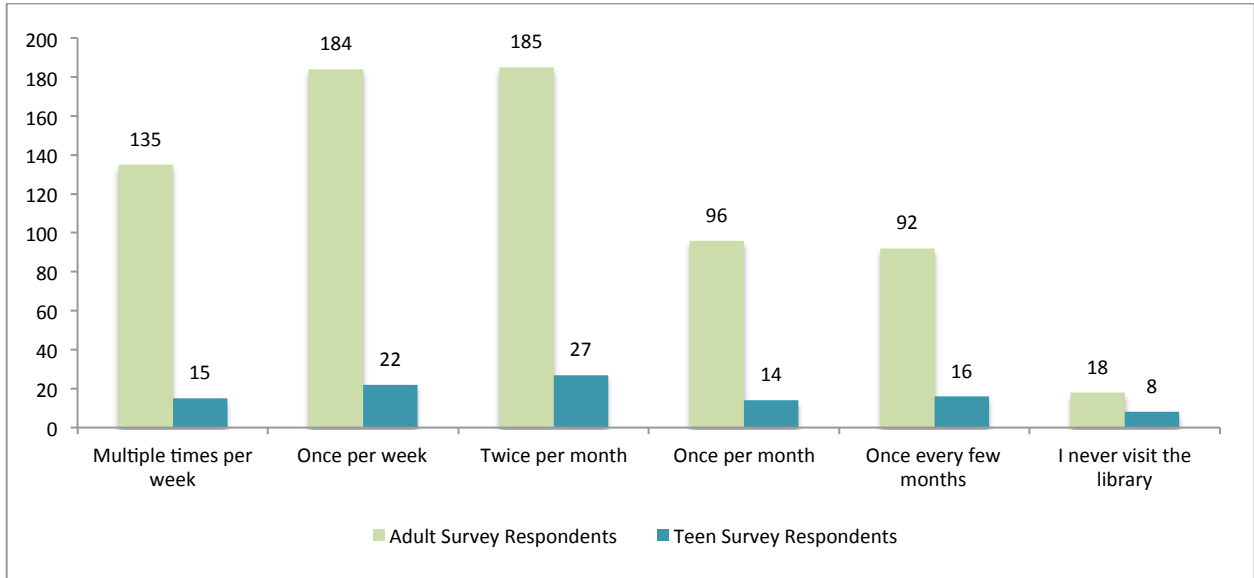

COMMUNITY POPULATION

According to the American Community Survey and U.S. Census data, Lake Forest has seen slight population decline since 2000, as well as an increasingly aging population. During this time period, the median age has increased from 41.0 years (2000 Census) to 47.0 years (American Community Survey, 2011-2015).

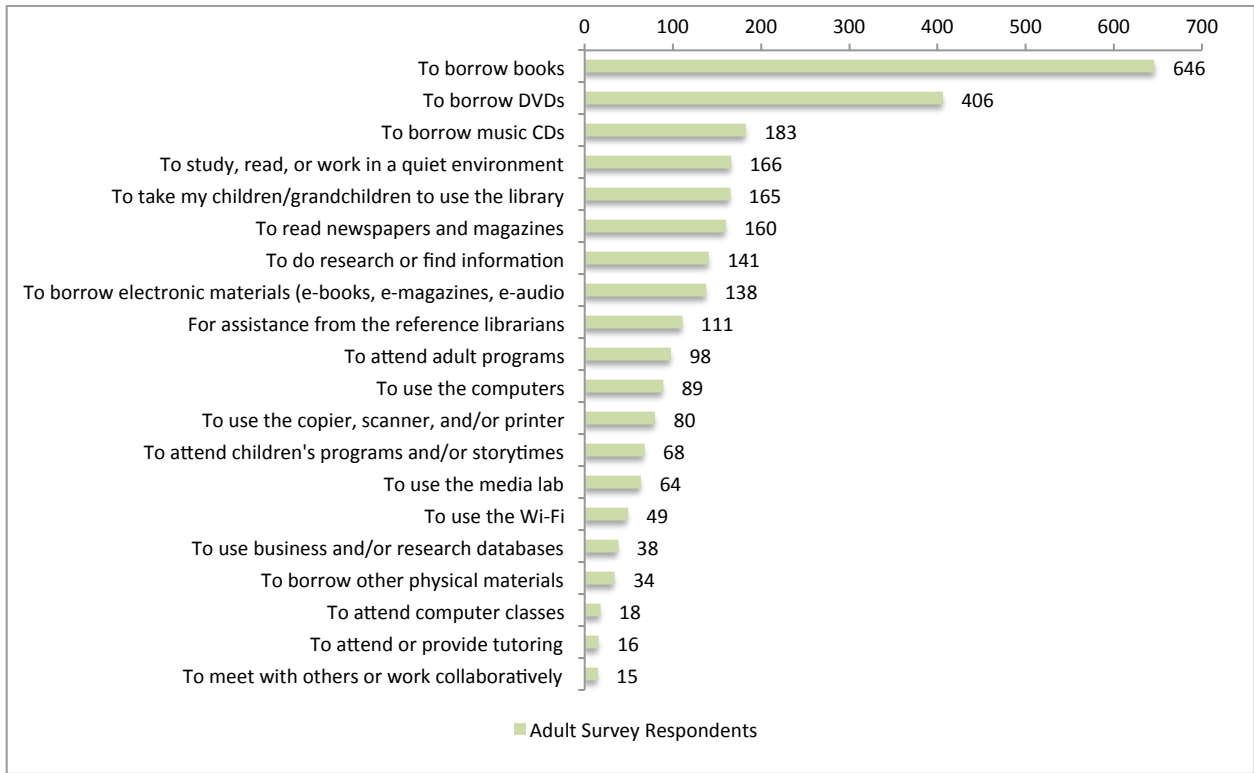

COMMUNITY SURVEY

An online survey was distributed during the spring of 2017 via e-blast and posts on social media and the library's website. Paper copies were also made available at the library and during library events. During the open survey period, 823 survey responses (representing 1,932 household members) were received. Survey results are as follows:

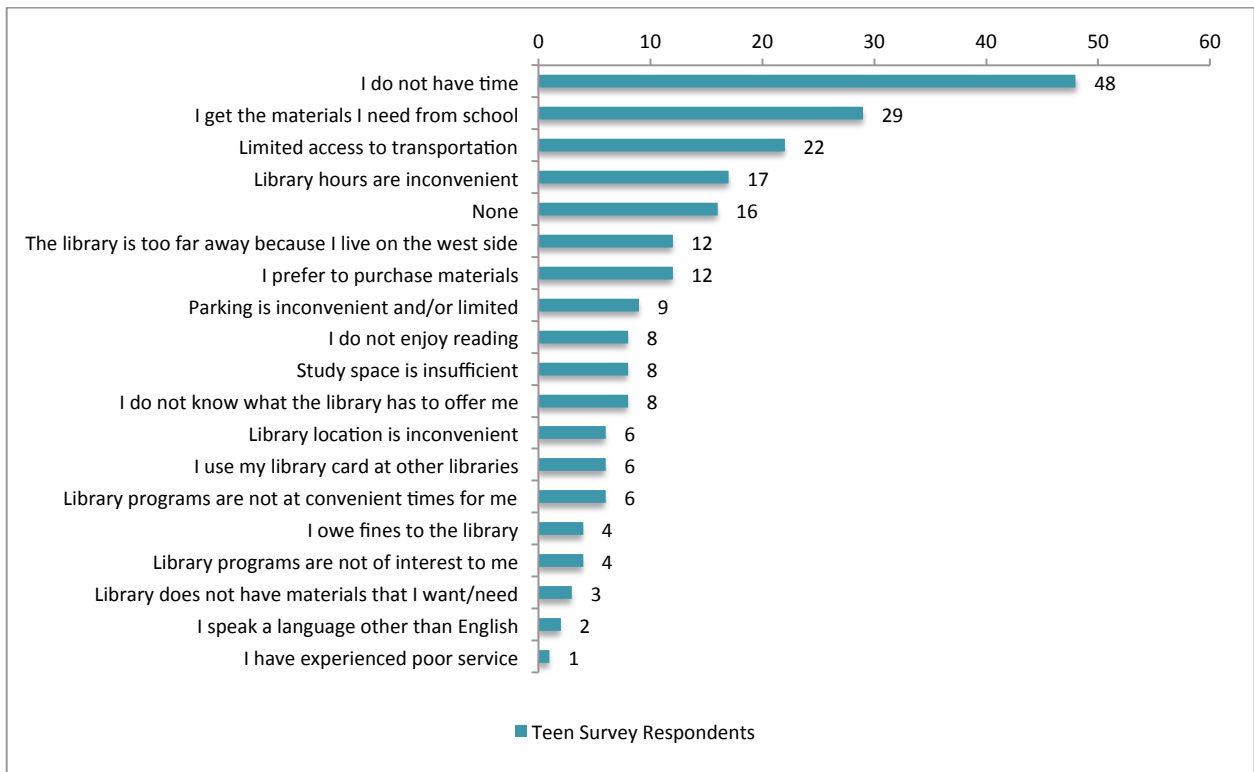

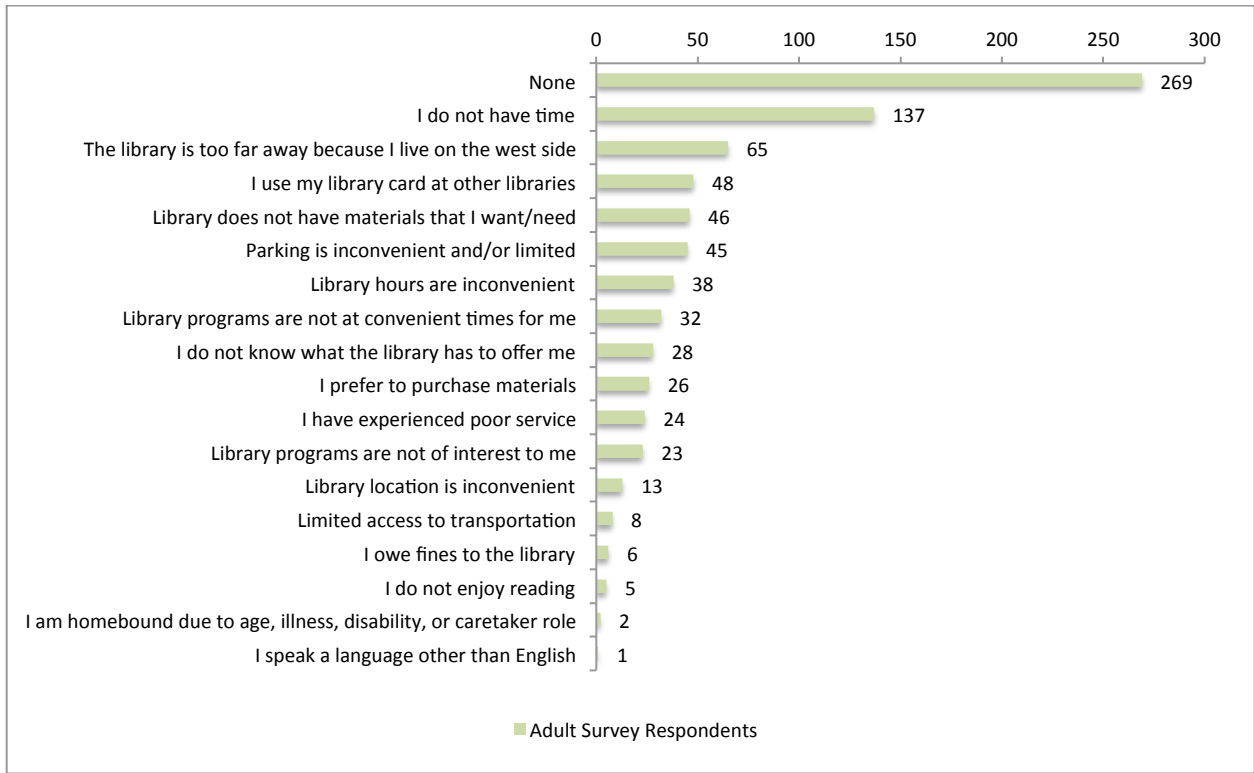

HOW OFTEN DO YOU USE THE LIBRARY?

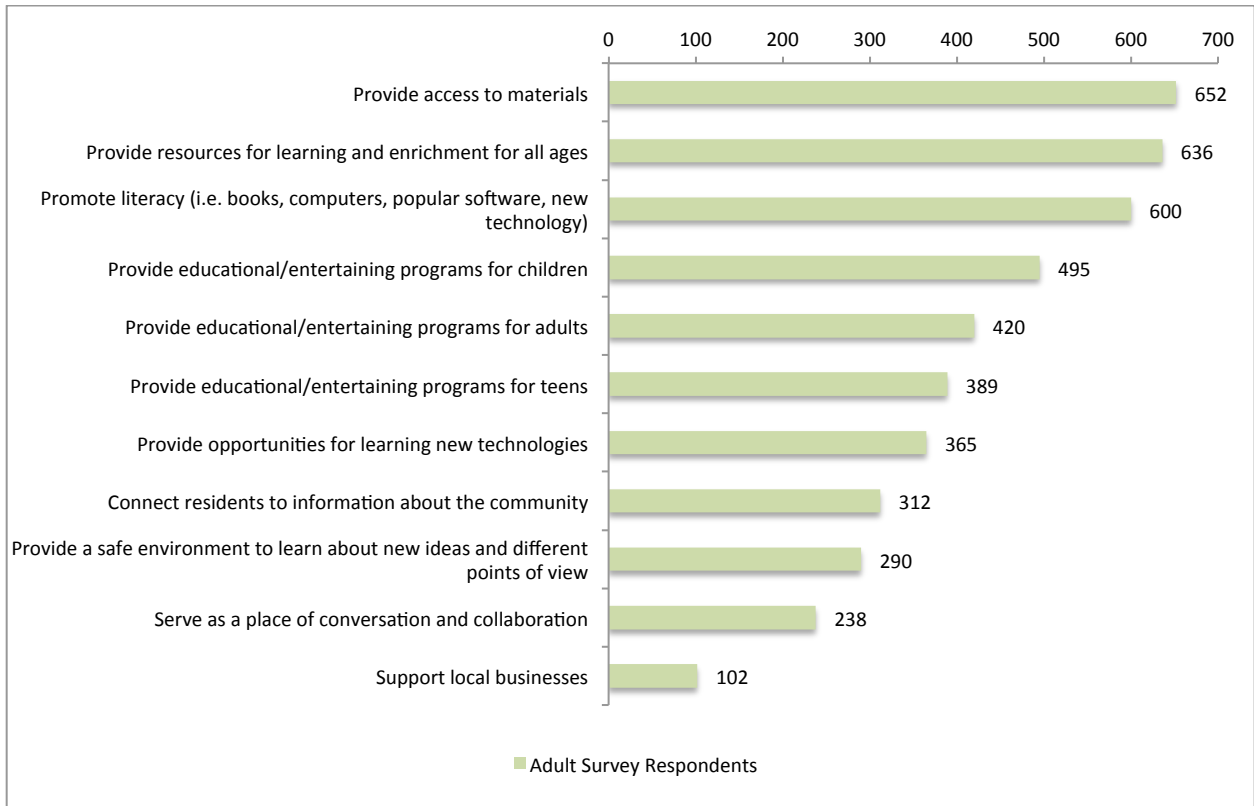

**WHAT ARE YOUR REASONS FOR USING THE LIBRARY?
(PLEASE CHECK ALL THAT APPLY.)**

WHICH FACTORS REFLECT WHY YOU DO NOT USE THE LIBRARY MORE OFTEN, IF ANY? (PLEASE CHECK ALL THAT APPLY.)

WHAT DO YOU VIEW AS THE ROLE OF THE PUBLIC LIBRARY IN LAKE FOREST? (PLEASE CHECK ALL THAT APPLY.)

PLEASE INDICATE YOUR LEVEL OF INTEREST IN THE FOLLOWING CATEGORIES OF ADULT PROGRAMS.

Based on assigning weights¹ to the available responses by level of interest, the programs listed below are in order of highest interest to lowest interest and include the weighted score (in parentheses). Raw counts of each response are provided following the weighted list.

Literature/Author Talks (3.98)	Politics and Current Events (3.44)
Arts and Culture (3.92)	Culinary/Cooking/Food/Entertaining (3.42)
History (local and otherwise) (3.81)	Gardening (3.29)
Travel (3.72)	Genealogy (3.23)
Music and/or Film (3.72)	Writing and Publishing (3.09)
Technology (3.57)	Crafts (2.93)
Health and Wellness (3.53)	Sports (2.58)
Book Discussion Groups (3.46)	

	Very Interested	Interested	Neither Interested nor Disinterested	Disinterested	Very Disinterested

PLEASE INDICATE WHICH ELECTRONIC MATERIALS YOU USE AND HOW YOU ACCESS THEM. (PLEASE CHECK ALL THAT APPLY.)

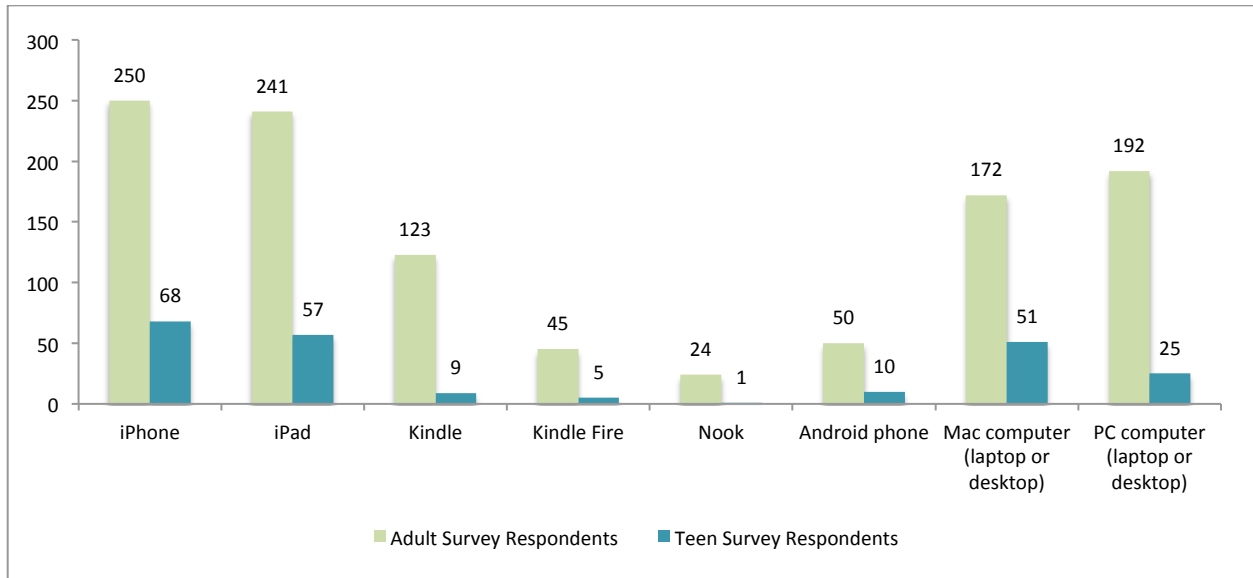

Adult Survey Respondents

Teen Survey Respondents

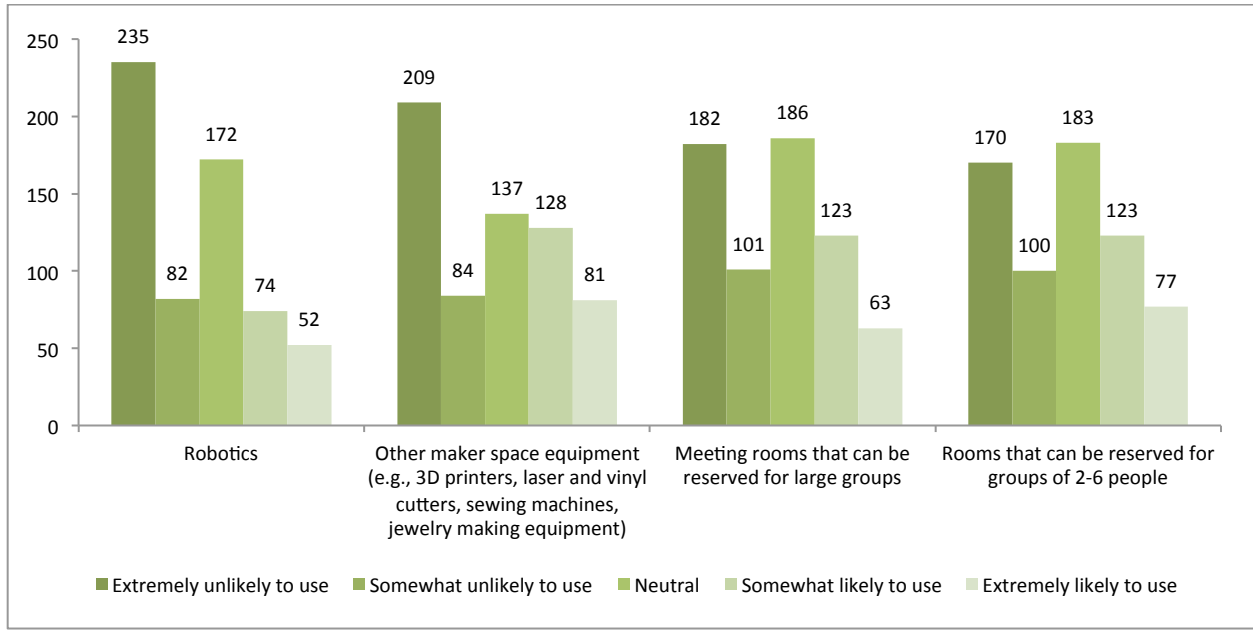

IF YOU DO USE ELECTRONIC MATERIALS, PLEASE INDICATE HOW YOU ACCESS THEM. (PLEASE CHECK ALL THAT APPLY.)

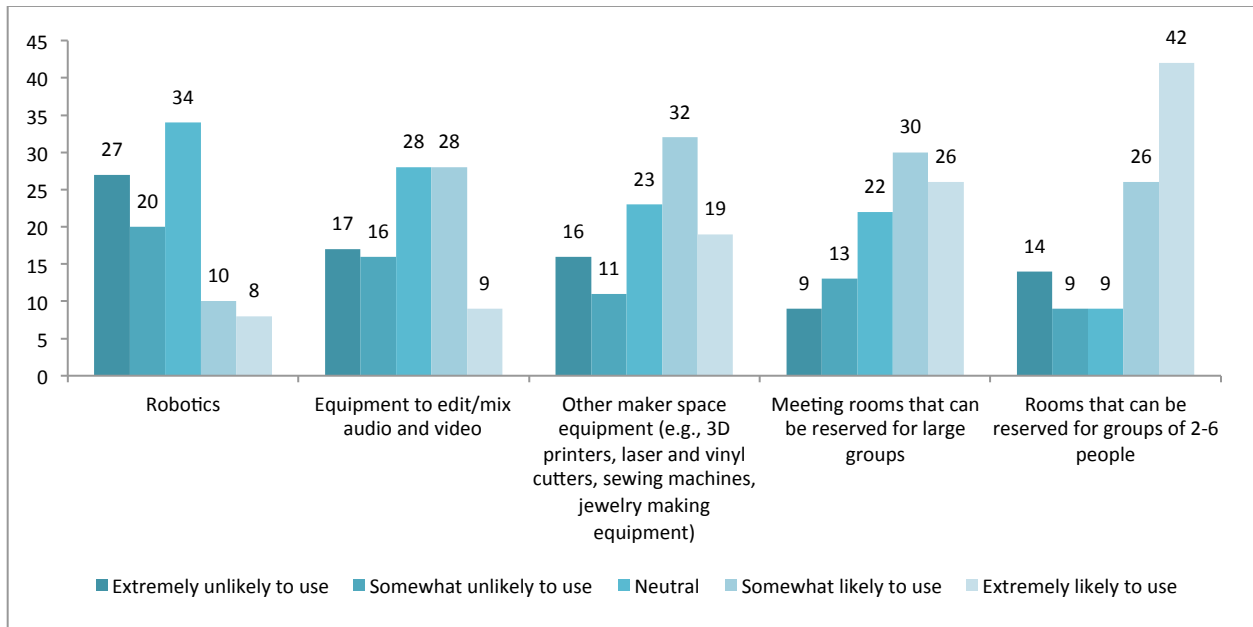

HOW LIKELY WOULD YOU BE TO USE THE FOLLOWING IF THE BUDGET AND SPACE ALLOWED FOR THEM TO BE ADDED TO THE LIBRARY?

Adult Survey Respondents

Teen Survey Respondents

PLEASE INDICATE HOW STRONGLY YOU AGREE OR DISAGREE WITH THE FOLLOWING STATEMENTS.

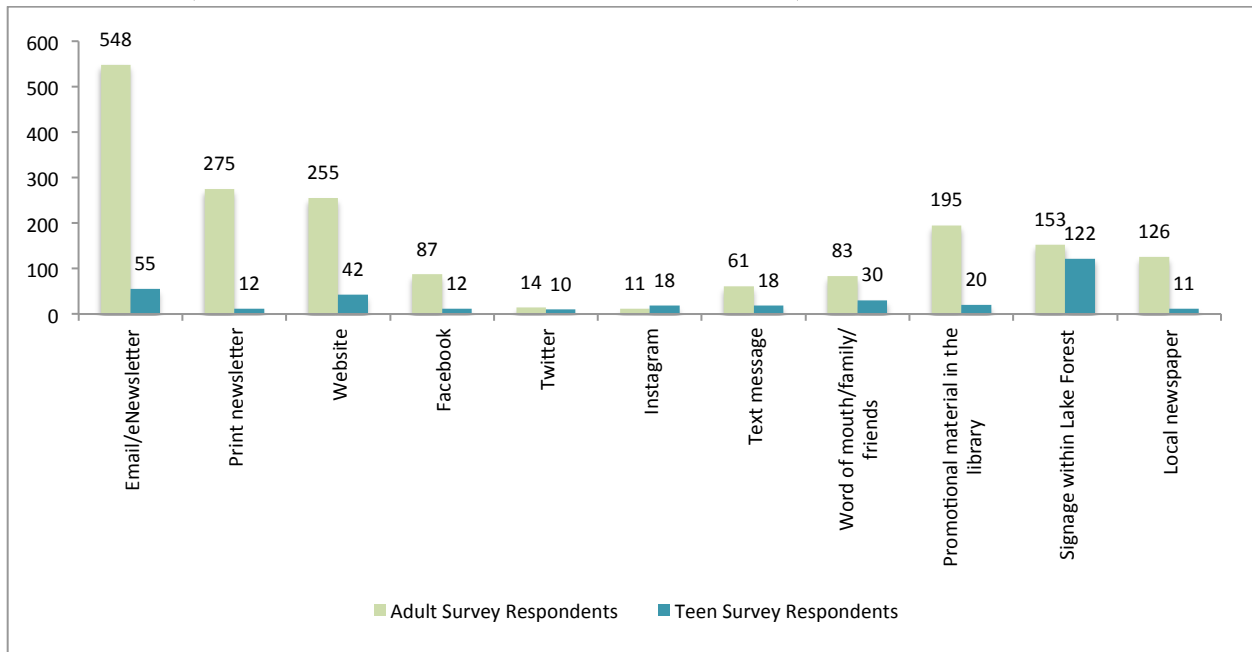

Adult Survey Respondents

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
The library is relevant to the Lake Forest community.	594 (83.5%)	89 (12.5%)	24 (3.4%)	1 (0.1%)	3 (0.4%)
I would recommend the library to my neighbors.	575 (81.4%)	99 (14.0%)	22 (3.1%)	5 (0.7%)	5 (0.7%)

Teen Survey Respondents

	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
The library is relevant to teens in the Lake Forest community.	39 (38.2%)	45 (44.1%)	15 (14.7%)	3 (2.9%)	0 (0.0%)

HOW DO YOU PREFER TO RECEIVE INFORMATION ABOUT THE LIBRARY? (PLEASE CHECK ALL THAT APPLY.)

FOCUS GROUPS

Focus groups were held with community leaders, residents, and library staff in June 2017. Additional phone interviews were conducted with interested parties who were not able to participate in person.

RESIDENTS

Residents routinely named the following aspects of the library as its greatest strengths:

- Media lab, with some participants considering it to be a “fountain of knowledge and information,”
- Children’s room and programs, calling them “phenomenal”
- Interlibrary loan access
- Staff, with many participants referring to staff as “extremely helpful,” “very patient,” and “always nice.” One individual said, “Even if you come at the end of the day, they are still very patient and very helpful.”

Areas of library operations residents would like to see improved are related primarily to accessing the building, the collection, and marketing and communications. Participants repeatedly noted that “everyone has to walk around the perimeter” of the building and that the parking and building entry configurations complicate visits for those with physical disabilities and young children. Parking was reported to be a significant challenge, with participants calling it “brutal” and “impossible when there is a program going on.”

While residents strongly appreciate and value the history and “magnificence” of the library building, including its “priceless prints” and “hand painted murals,” some participants felt the area dedicated to teens should be expanded, and others would like space for studying and small meetings (two to four people) to be added. Residents said, “keeping the physical and interior integrity” of the building is important, but “libraries should now be centers of teaching people.”

Participants suggested the library offer programs on the following topics:

- Music (performance and informative)
- Collaborations with local bookstore to offer more author visits (children’s through adult)
- Children’s storytimes and programs in the evening to accommodate working parents’ schedules
- Writing workshops
- Featuring community members as speakers

- Parenting topics
- Lectures
- Travel
- Photography
- Changes in technology
- Current events
- Gardening

In addition, there were several areas of the collection that residents said they would like to be expanded, including audiobooks and all materials for young adults. In addition, participants preferred that the DVD collection be organized completely alphabetically to allow for easier identification of titles. Participants reported using e-materials, particularly e-books and e-audiobooks, but felt that Overdrive was “confusing to use” and that “there need to be bigger selections.” Residents would also like to see more explanation of what databases are available for public use, and whether any databases are accessible remotely, away from the library. Many participants reported having challenges regarding returning their audiovisual materials and having the catalog show that they were returned on time. Lastly, residents suggested an interest in a self checkout machine as an alternative to traditional circulation procedures rather than a replacement of staff.

Residents often suggested the library expand its use of email for communicating with patrons, including targeted emails based on individual interests and program topics. While participants received most of their information from the library newsletter, they said more frequent communications would be helpful. In addition, they felt the library website was “difficult to navigate,” “looks unattended” and “in need of an update.” Residents reported wanting a responsive, mobile-friendly website that makes finding relevant information simple.

When asked about non-users and Lake Forest residents who do not engage with library services, participants suggested that the “current library is good for specific life stages, but the gaps need to be filled in,” echoing sentiments that the library has historically served children and older adults well. Residents would like to see a more robust marketing strategy implemented, as well as seeing the library’s successes in the news more often, noting that “some people don’t see the value in the library.”

COMMUNITY LEADERS

Community leaders, representing local municipal and community-based nonprofit organizations, suggested one of the library's strengths is its willingness to collaborate with other organizations on shared events and programming. There was some concern that organizations throughout Lake Forest may duplicate services and programs without sufficient communication. One community leader said, "There are so many cultural organizations, so many events, so many programs – how do we all attract enough people?" She added, "Are we starting to reach a saturation point, or could some of us collaborate to get more bang for our buck?"

Community leaders noted the need for a community-wide calendar, which has been discussed in the past, to serve as a hub of information for local organizations serving residents of Lake Forest. They noted that parking continues to be a challenge at the library. Youth-serving organizations encouraged the library to continue its programs around midterm and final exams, and to continue to offer quiet space for students to study.

Community leaders added that the library is a unique asset to the community and serves as a "focal point" for arts and culture, as well as a place to access information, with one community leader referring to the library as "an architectural and art icon." Participants were complimentary of library staff and encouraged increased marketing because there are "a lot of online resources at the library that people aren't aware they can access."

LIBRARY STAFF

Library staff observed that strengths of the library include the building, which is "attractive to a lot of people" and "a rare type of library building that has this type of warmth," its ease of use, and the friendly interactions between staff and patrons. Staff added that there is an "approachability" present in the library that allows staff to provide "personalized service" and "follow-up after someone asks a question," noting that they "know many patrons by name." They felt the downtown location is "easily accessible" and that the library is a "neighborhood institution in town." The children's department also was identified as an asset to the library, for children, parents, and grandparents to visit.

Staff noted weaknesses of the library include parking, which is "inadequate," "gets complaints," and "inaccessible for the elderly and disabled;" limited adult programming, although this is increasing in quantity and breadth; and lack of private meeting space. In addition, staff felt that the library could communicate with the public more frequently about

programs and services at the library, as well as new materials that are available. Many staff members felt that “marketing is nonexistent” but saw many opportunities to improve this perceived weakness through targeted communications, social media, and increased outreach to local businesses and organizations.

Some staff members felt that some residents view the library as “antiquated,” and they “would like to change this image a bit.” They would like to see more use of the library by teens, noting that “no kids of young adult age want to hang out here,” but realize available space is limited. Staff would also like to host more technology programs for young adults, such as sessions focused on robotics and STEM.

NEXT STEPS

Based on the survey results and feedback collected during the community focus groups, residents of Lake Forest value traditional library service as a source of learning and access to information while simultaneously appreciating the library’s role in connecting the community to changing technology. Analyzing this feedback during its upcoming strategic planning process will provide the library with insights into the goals of residents and organizations to enhance the library’s role as a pillar of the community services offered in Lake Forest.
